## Ice Plug Internal Pipe Investigation

Information on this form covers the minimum requirements of NFPA 25 for fire sprinkler systems. More frequent inspection, testing, and maintenance may be necessary depending on the conditions of the occupancy and the water supply. An examination of representative section of this sprinkler system has been made to determine internal conditions. (IAW NFPA 25) All questions to be answered Yes, No, and Not Applicable (N/A). No answers are to be explained on the Deficiency Notification Report.

## Ice Plug Internal Pipe Investigation Points

Branch lines examined	Cross mains examined	Transition point	Other points examined
